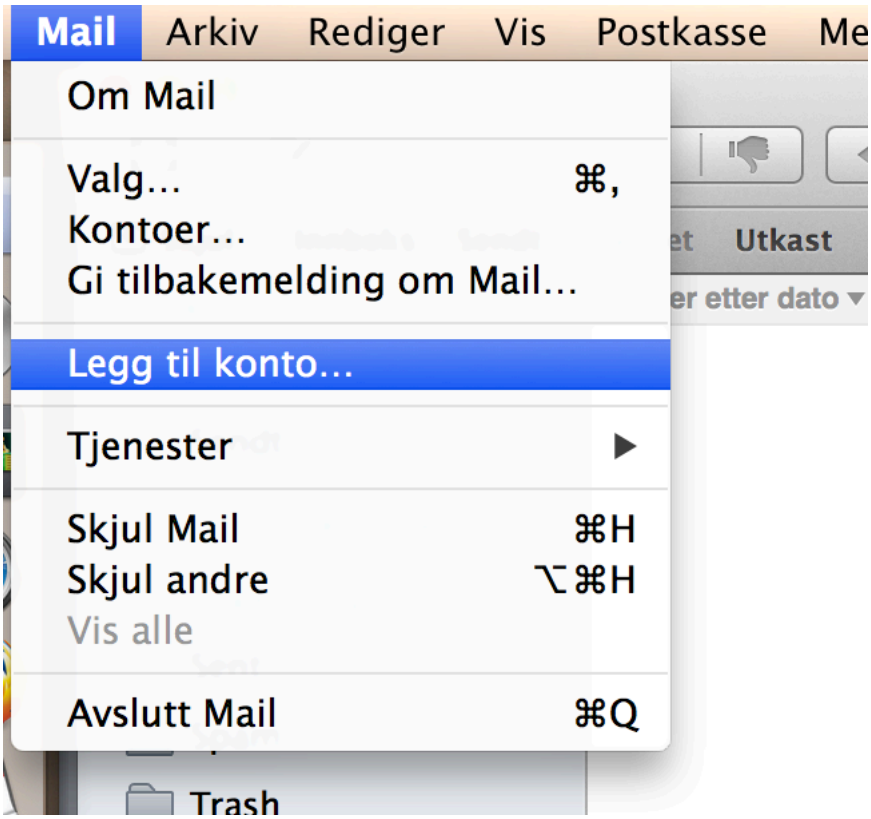
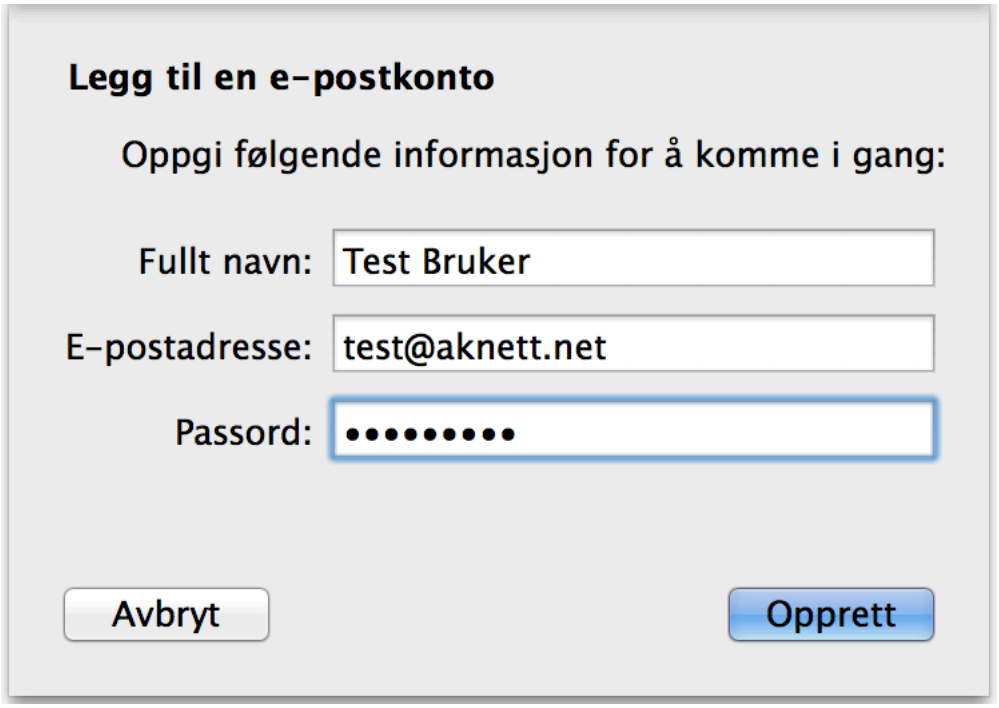
Veiledning for oppsett av POP epost i Mail for MAC.

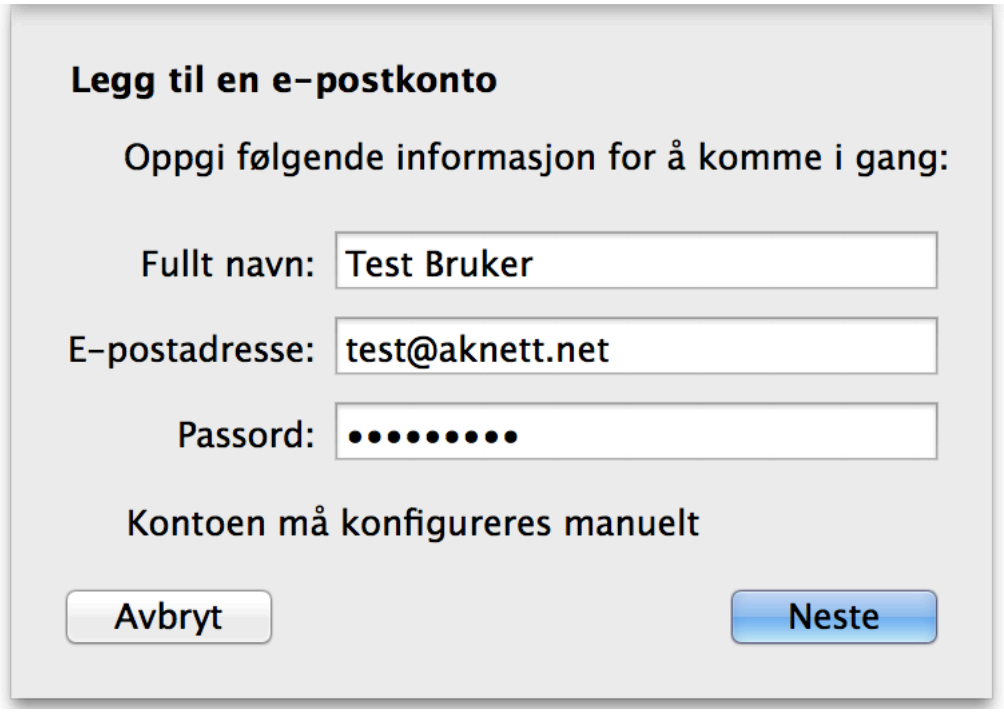
NBNB! Denne veiledningen er laget for aknet.net eposter. OM du skal sette opp en lysglimt.net epost så erstatter du bare aknett.net med lysglimt.net i alle dialogbokser.

Start Mail og velg legg til konto



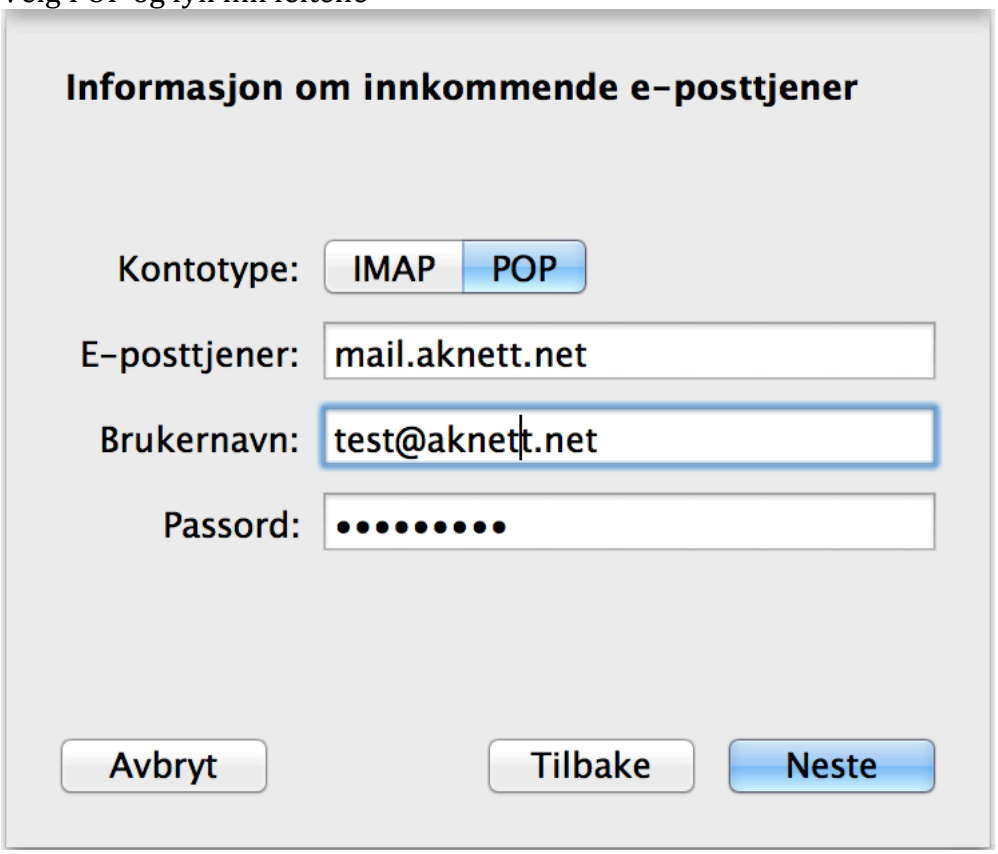


Når du klikker opprett vil du få beskjed om at kontoen må konfigureres manuelt.

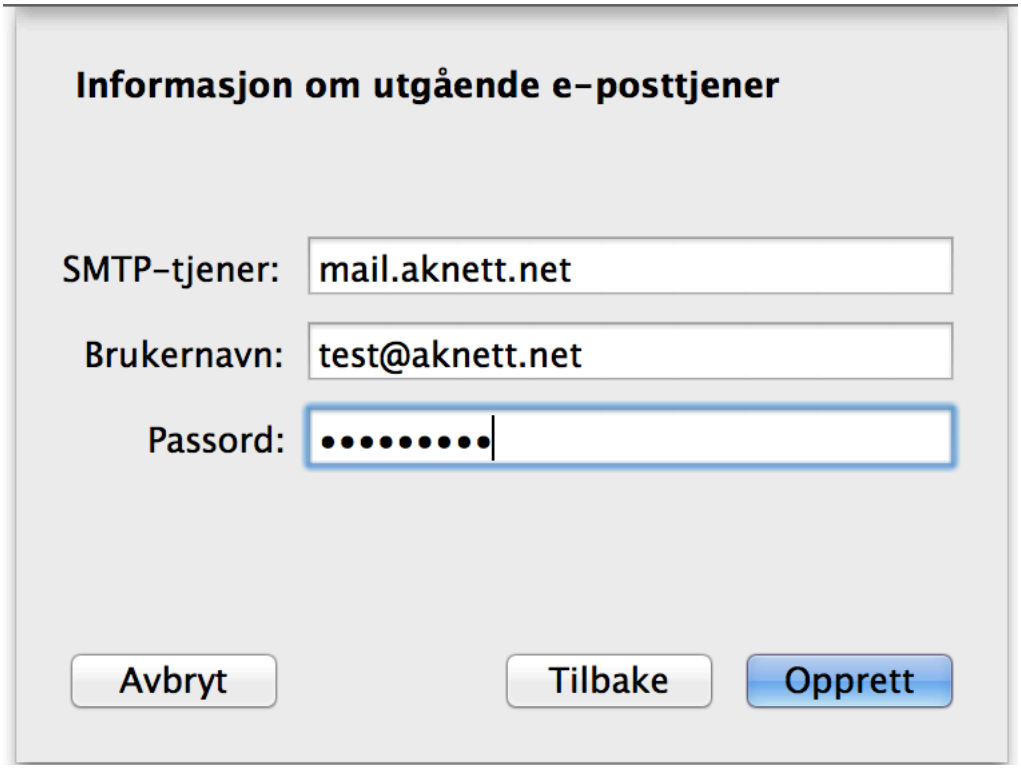


Klikk neste

Velg POP og fyll inn feltene



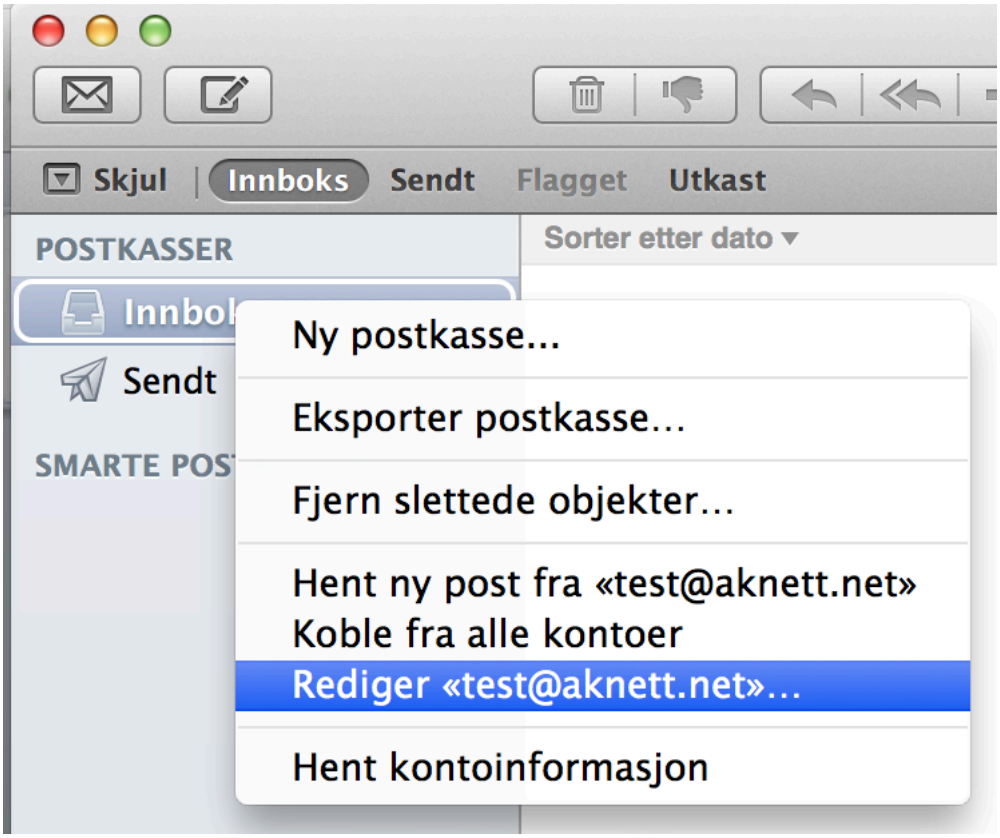
Fyll inn feltene som vist under



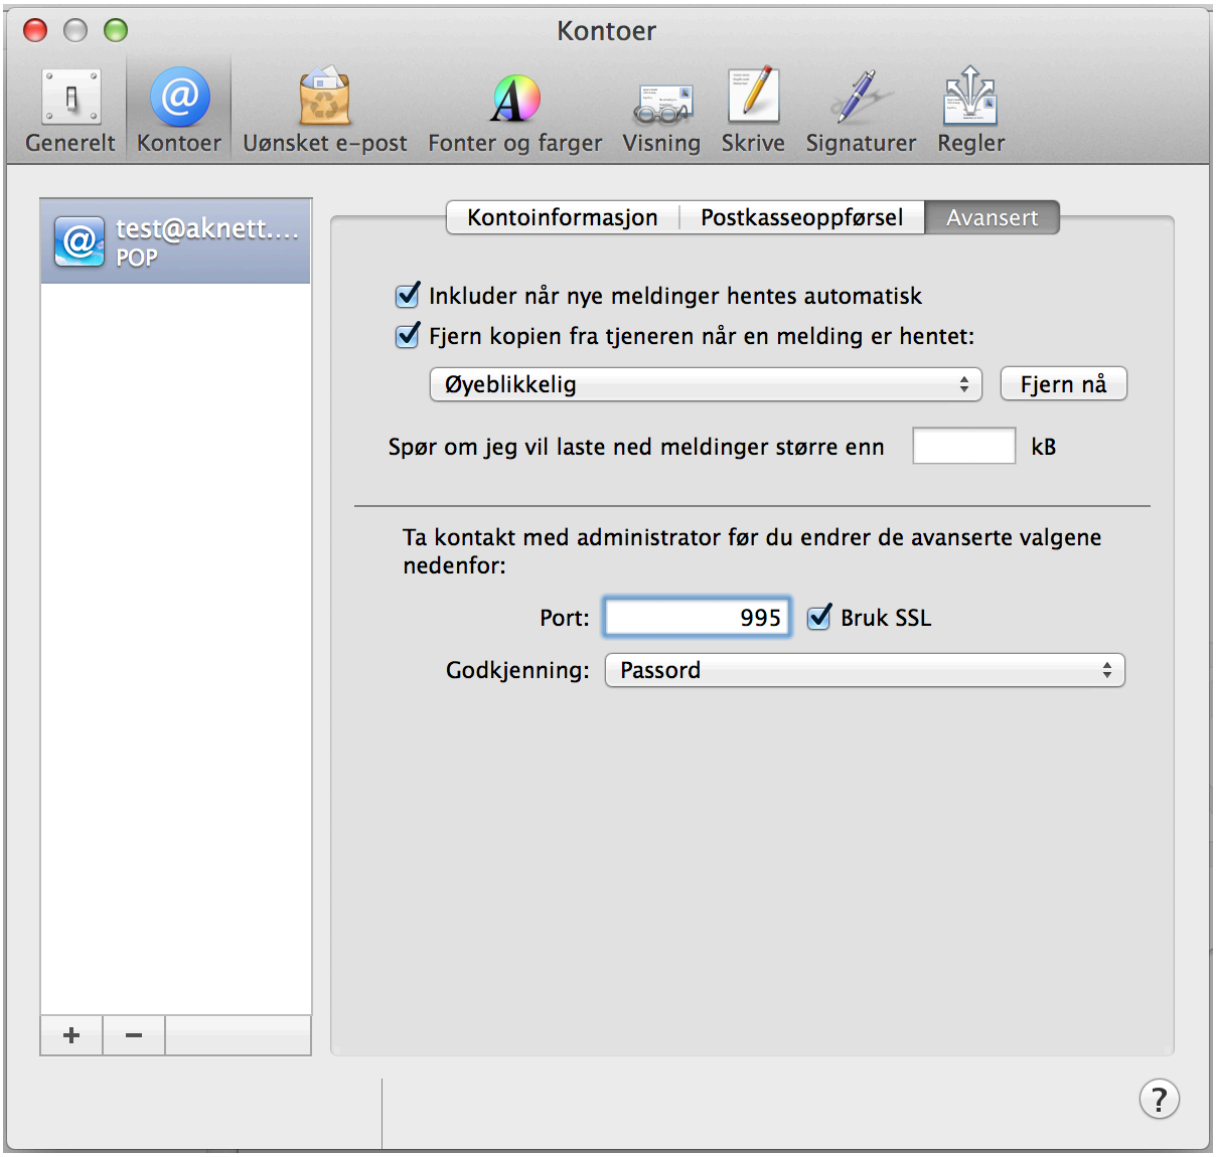
Om du får denne advarselen så bare klikk koble til

Klikk opprett

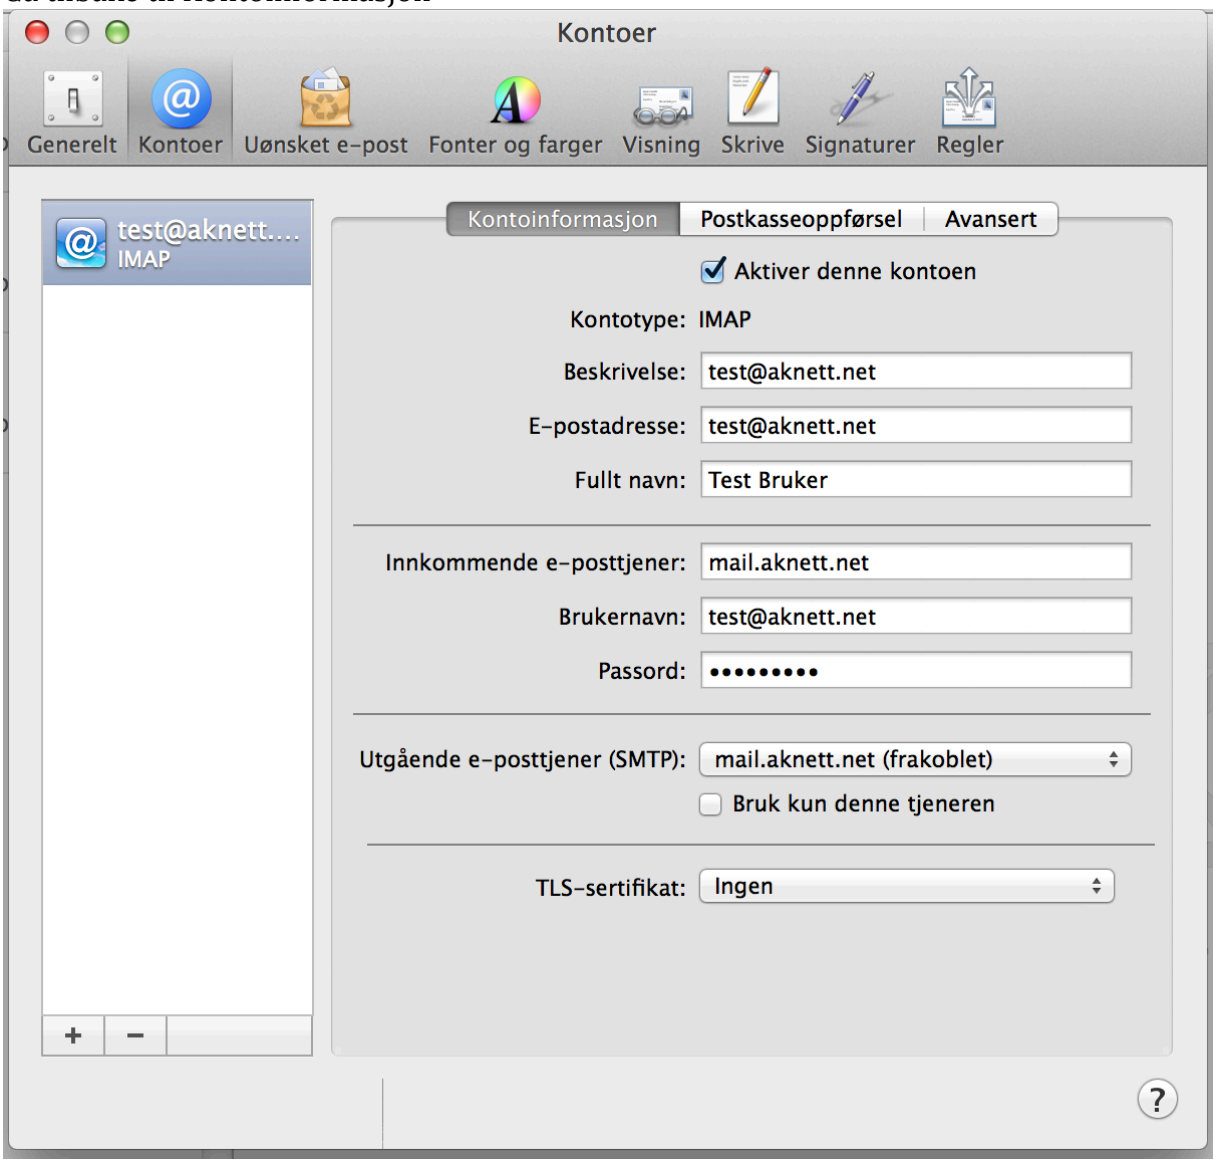
Nå må du redigere noen detaljer, høyreklikk kontoen du opprettet, og velg rediger



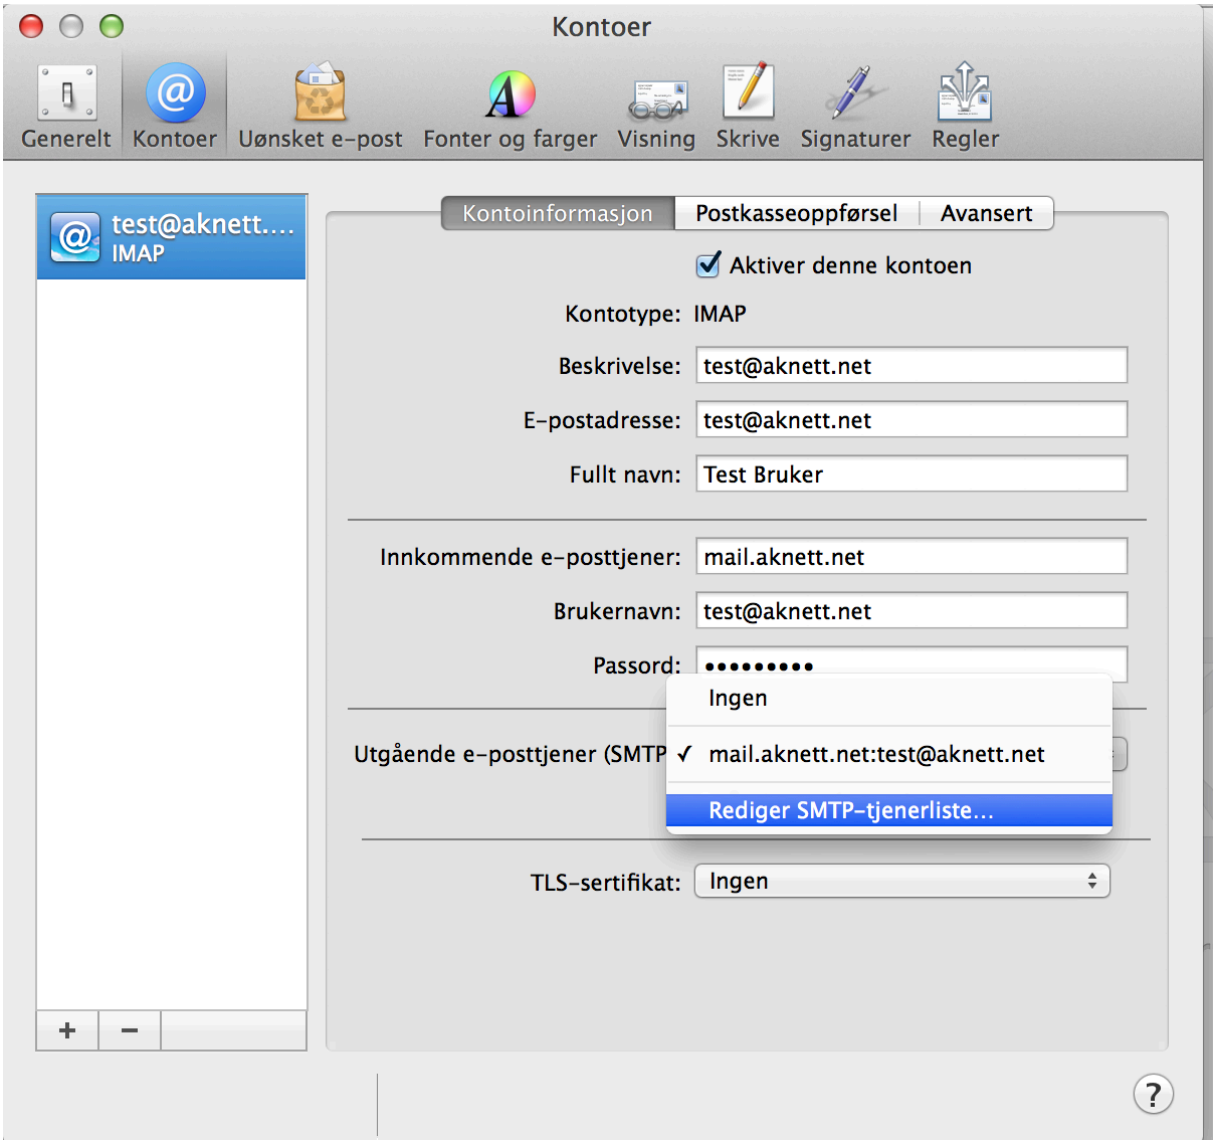
Velg Avansert faneark
Sjekk at du har dette oppsettet, endre om nødvendig



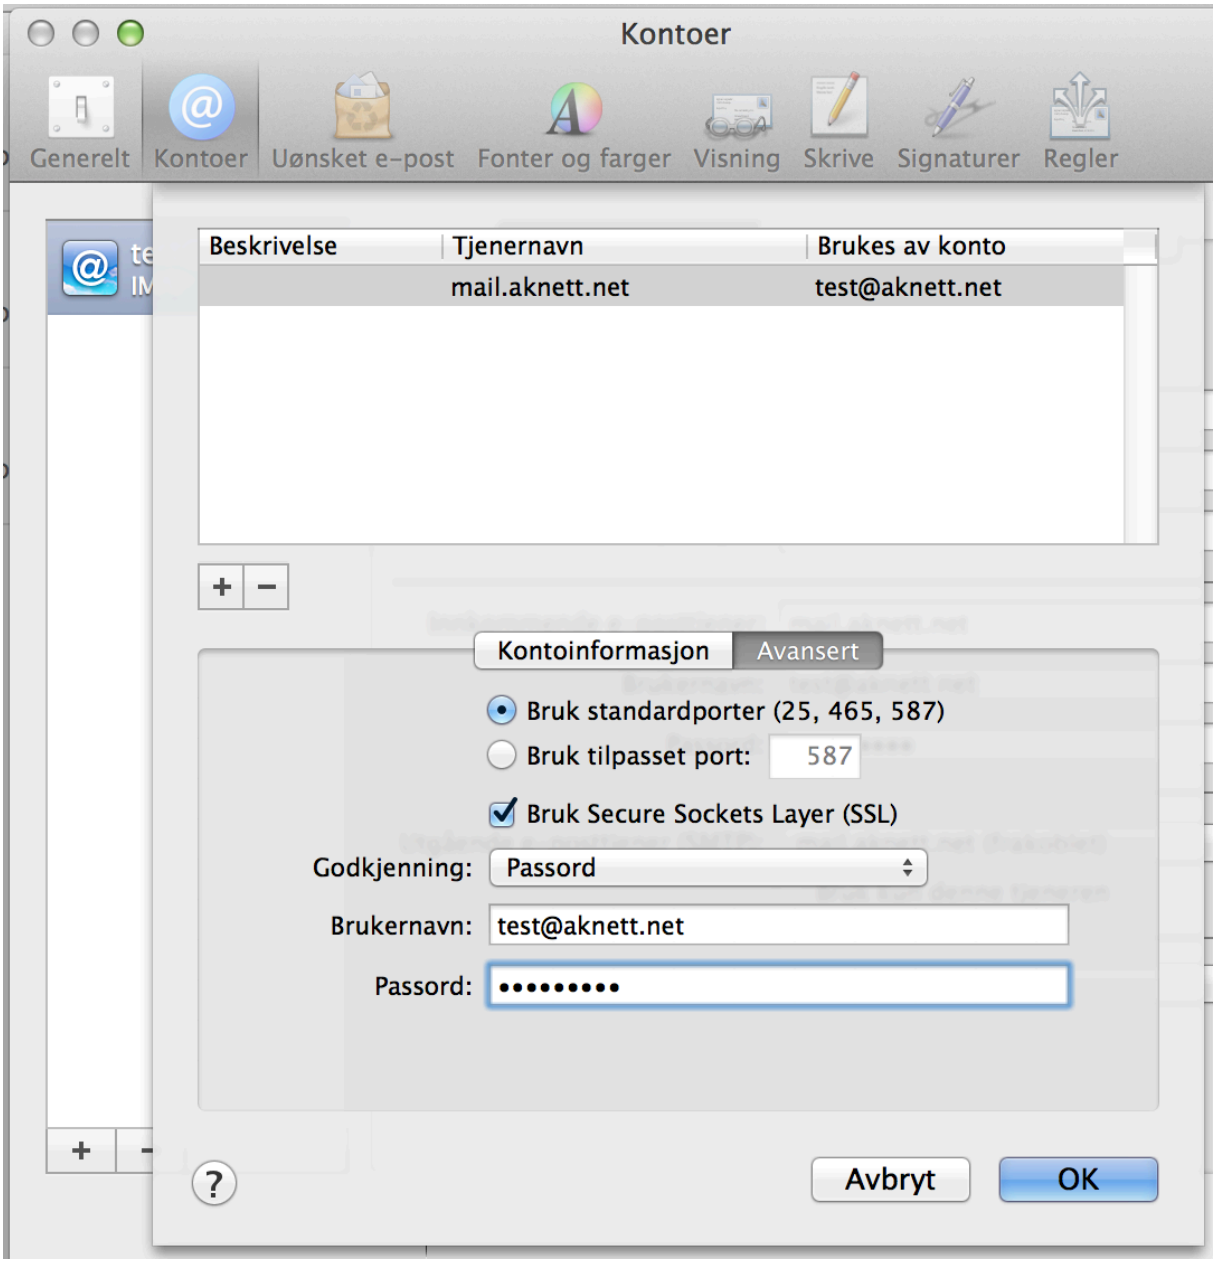
Gå tilbake til Kontoinformasjon

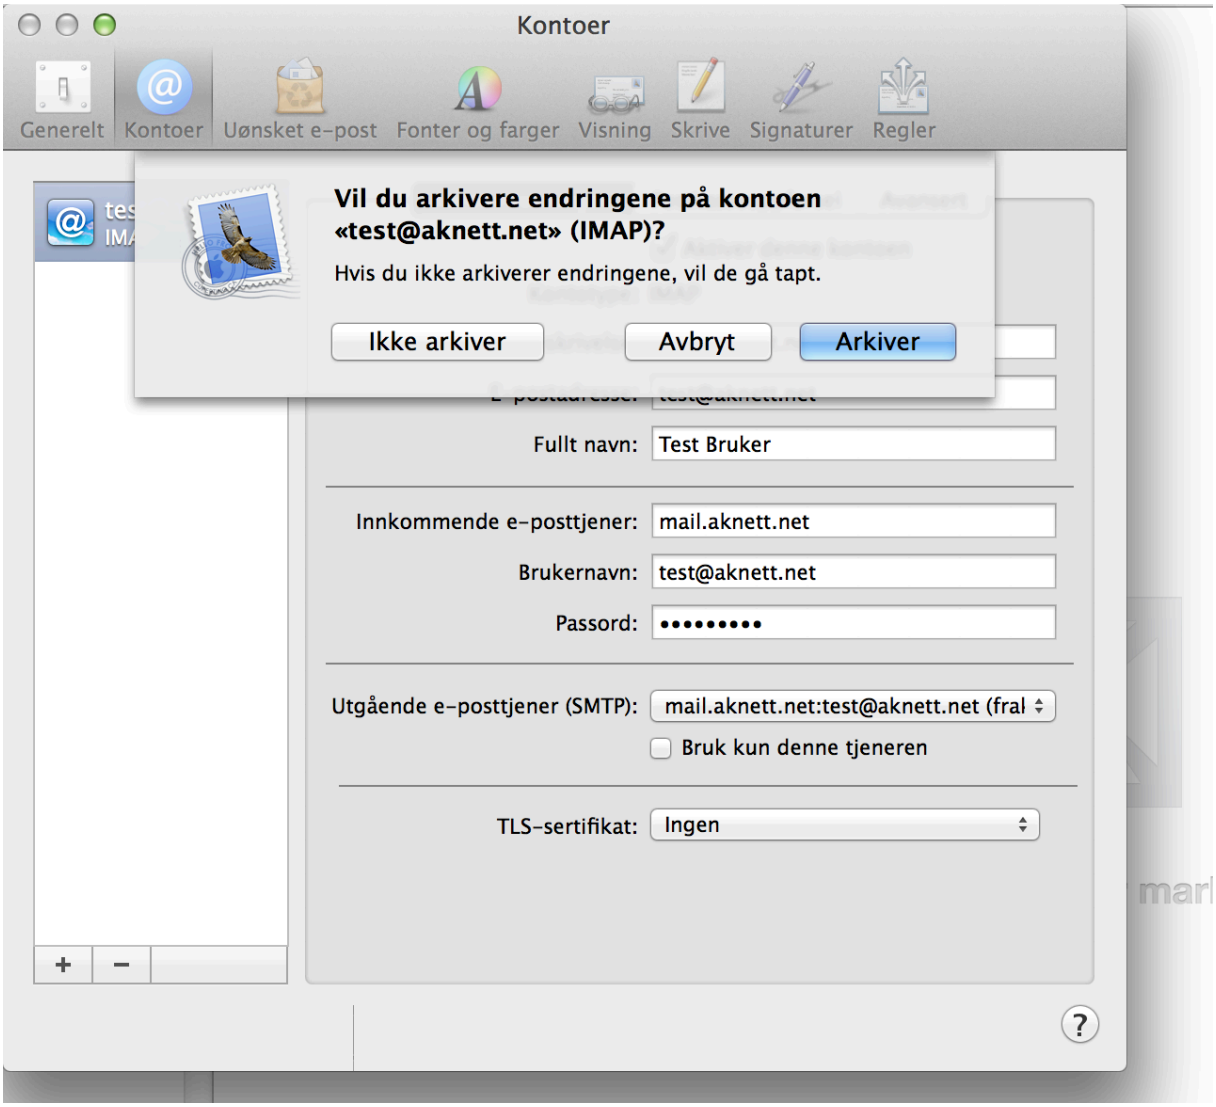


Klikk på navnet til utgående tjener og velg rediger SMTP-tjenerliste



Her velger du SMTP tjeneren du har satt opp og velgerfanearket Avansert, fyll inn/endre som nødvendig, klikk OK





Husk å Arkivere når du avslutter
